Noncitrus Fruits Highlights

In 2024, the Nation's utilized production for the 21 estimated noncitrus fruit crops totaled 15.9 million tons, down 3 percent from 2023. In terms of utilized production, the three largest crops were grapes, apples, and strawberries, which combined for 77 percent of the noncitrus fruits total in 2024. Bearing acreage totaled 1.90 million, up 2 percent from the previous season. The major deciduous crops accounted for 1.53 million or 81 percent of the total bearing acreage.

The value of utilized production for the 21 noncitrus fruit crops totaled \$18.9 billion, up 5 percent from the previous year. Grapes, strawberries and apples claimed the highest values, accounting for 69 percent of the total value of utilized production when combined.

Tree Nuts Highlights

In 2024, the Nation's utilized production for tree nut crops totaled 3.61 million tons, down 4 percent from 2023. The value of utilized production for 2024 tree nut crops totaled \$9.42 billion, up 15 percent from the previous year. Bearing acreage totaled 2.79 million acres, up 1 percent from 2023.

Noncitrus Fruits Comments

Apple, Commercial: Utilized production in 2024 totaled 10.5 billion pounds, down 5 percent from 2023. Bearing acreage was estimated at 299,500, down slightly from the previous year. The average yield was 36,200 pounds per acre, down 2,000 pounds from the previous year. Of the total utilized production, 7.47 billion pounds were for the fresh market and 3.06 billion pounds were for processing. The value of the crop totaled \$2.90 billion, up 2 percent from the previous season, with an average annual price of 27.6 cents per pound.

Apricot: Utilized production in 2024 totaled 32,330 tons, down 10 percent from 2023. Bearing acreage was estimated at 5,750 acres, down 3 percent from the previous year. The average yield was 5.97 tons per acre, down 0.06 ton from the previous year. Of the total utilized production, 18,210 tons were for the fresh market and 14,120 tons were for processing. The value of the crop totaled \$46.6 million, down 5 percent from the previous season, with an average annual price of \$1,440 per ton.

Avocado: Utilized production for the 2024 crop season totaled 195,850 tons, up 53 percent from the previous year. Bearing acreage was estimated at 53,010 acres, up 2 percent from the previous year. The average yield was 3.72 tons per acre, up 1.25 tons from the previous year. Of the total utilized production, 193,260 tons were for the fresh market and 2,590 tons were for processing. The value of the 2024 crop totaled \$537 million, up 115 percent from the previous season, with an average annual price of \$2,740 per ton.

Blueberry, Cultivated: Utilized production in 2024 totaled 789 million pounds, up 23 percent from 2023. Area harvested was estimated at 104,800 acres, up 2 percent from the previous year. The average yield was 7,590 pounds per acre, up 1,250 pounds from the previous year. Of the total utilized production, 431 million pounds were for the fresh market and 359 million pounds were for processing. The value of the crop totaled \$1.15 billion, up 6 percent from the previous season, with an average annual price of \$1.45 per pound.

Blueberry, Wild: Utilized production in Maine for 2024 totaled 90.8 million pounds, up 11 percent from 2023. Area harvested was estimated at 19,100 acres, down 15 percent from the previous year. The average yield was 4,760 pounds per acre, up 1,080 pounds from the previous year. Of the total utilized production, 1.45 million pounds were for the fresh market and 89.4 million pounds were for processing. The value of the crop totaled \$49.3 million, up 15 percent from the previous season, with an average annual price of 54.2 cents per pound.

Cherry, Sweet: Utilized production in 2024 totaled 360,710 tons, down 1 percent from the previous season in comparable States. Bearing acres were estimated at 95,600, up 2 percent from the previous season in comparable States. The average yield was 3.84 tons per acre, down 0.15 ton from the previous season in comparable States. Of the total utilized production, 286,440 tons were for the fresh market and 74,270 tons were for processing. The value of the utilized crop totaled \$817 million, up 26 percent from the previous season in comparable States, with an average annual price of \$2,270 per ton.

In 2024, estimates for sweet cherries began in Michigan.

Cherry, Tart: Utilized production in 2024 totaled 207 million pounds, up 29 percent from the previous year in comparable States. Bearing acreage was estimated at 28,900 acres, down 1 percent from the previous year in comparable States. The average yield was 7,430 pounds per acre, up 1,857 pounds from the previous year in comparable States. Of the total utilized production, 300,000 pounds were sold for the fresh market and 207 million pounds were for processing. The value of the crop totaled \$41.9 million up 39 percent from the previous season in comparable States, with an average annual price of 20.2 cents per pound.

Beginning in 2024, estimates for tart cherries were discontinued in New York, Washington, and Wisconsin.

Coffee: Utilized production in Hawaii for 2024-2025 totaled 22.4 million pounds (cherry basis) up 16 percent from 2023. Bearing acreage was estimated at 7,000 acres, down 5 percent from the previous year. The average yield was 3,610 pounds per acre, up 460 pounds from the previous year. The value of the crop totaled \$53.0 million, up 10 percent from the previous season, with an average annual price of \$2.37 per pound.

Cranberry: Utilized production in 2024 totaled 8.91 million barrels, up 10 percent from 2023. Area harvested was estimated at 37,000 acres, up 4 percent from the previous year. The average yield was 241.8 barrels per acre, up 14.6 barrels from the previous year. Of the total utilized production, 284,000 barrels were for the fresh market and 8.63 million barrels were for processing. The value of the crop totaled \$340 million, up 11 percent from the previous season, with an average annual price of \$38.10 per barrel.

Dates: Utilized production in 2024 totaled 61,890 tons, down 3 percent from 2023. Bearing acreage was estimated at 16,500 acres, up 1 percent from the previous year. The average yield was 3.78 tons per acre, down 0.13 ton from the previous year. Of the total utilized production, 33,720 tons were for the fresh market and 28,170 tons were for processing. The value of the crop totaled \$279 million, up 27 percent from the previous season, with an average annual price of \$4,510 per ton.

Grape: Utilized production in 2024 totaled 5.40 million tons, down 12 percent from the previous season in comparable States. Bearing acreage was estimated at 923,000 acres, down 3 percent from the previous season in comparable States. The average yield was 5.85 tons per acre, down 0.61 ton per acre from the previous season in comparable States. Of the total utilized production, 872,610 tons were for the fresh market and 4.53 million tons were for processing. The value of the crop totaled \$6.19 billion, down 13 percent from the previous season in comparable States with an average price of \$1,150 per ton.

In 2024, estimates for grapes began in New York and Oregon.

Kiwifruit: Utilized production in California for 2024 totaled 35,330 tons, up 29 percent from 2023. Bearing acreage was estimated at 5,200 acres, up 200 acres from the previous year. The average yield was 6.80 tons per acre, up 1.30 tons from the previous year. All of the total utilized production was for the fresh market. The value of the crop totaled \$110.9 million, up 42 percent from the previous season, with an average annual price of \$3,140 per ton.

Nectarine: Utilized production in California for 2024 totaled 128,240 tons, down 10 percent from 2023. Bearing acreage was estimated at 17,000, up 6 percent from the previous year. The average yield was 7.55 tons per acre, down 1.50 tons from 2023. The value of the crop totaled \$246 million, up 2 percent from the previous season, with an average annual price of \$1,920 per ton.

Olive: Utilized production in California for 2024 totaled 161,200, up 33 percent from the previous year. Bearing acreage was estimated at 43,000, up 8 percent from the previous year. The average yield was 3.78 tons per acre, up 0.74 ton from the previous year. All of the total utilized production was for processing. The value of the crop totaled \$144 million, up 52 percent from the previous season, with an average annual price of \$893 per ton.

Papaya: Utilized production in 2024 totaled 10.5 million pounds, up 10 percent from 2023. Bearing acreage was estimated at 640 acres, down 2 percent from the previous year. The average yield was 17,200 pounds per acre, up 1,400 pounds from the previous year. The value of the crop totaled \$6.74 million, up 4 percent from the previous year, with an average annual price of 64.5 cents per pound.

Peach: Utilized production totaled 696,080 tons in 2024, up 20 percent from the previous year. Bearing acreage was estimated at 73,800, unchanged from the previous year. The average yield was 9.61 tons per acre, up 1.62 tons from the previous year. Of the total utilized production, 383,430 tons were for the fresh market and 312,650 tons were for processing. The value of the crop totaled \$926 million, up 39 percent from the previous season, with an average annual price of \$1,330 per ton.

Beginning in 2024, estimates for peaches were discontinued in Washington.

Pear: Utilized production in 2024 totaled 509,160 tons, down 26 percent from 2023. Bearing acreage was estimated at 41,000 acres, up 2 percent from the previous year. The average yield was 12.50 tons per acre, down 4.70 tons from the previous year. Of the total utilized production, 375,800 tons were for the fresh market and 133,360 tons were for

processing. The value of the crop totaled \$301 million, down 21 percent from the previous season, with an average annual price of \$591 per ton.

Plum: Utilized production in California for 2024 totaled 90,750 tons, up 6 percent from 2023. Bearing acreage was estimated at 9,600, down 2 percent from the previous year. The average yield was 9.51 tons per acre, up 0.37 ton from the previous year. The value of the crop totaled \$158 million, up 13 percent from the previous season, with an average annual price of \$1,740 per ton.

Prune: Utilized production in California for 2024 totaled 77,710 tons, down 12 percent from 2023. Bearing acreage was estimated at 37,000, up 3 percent from the previous year. The average yield was 2.11 tons per acre, down 0.36 ton from the previous year. The value of the crop totaled \$171 million, down 10 percent from the previous season, with an average annual price of \$2,200 per ton.

Raspberry: Utilized production in 2024 totaled 181 million pounds, up 27 percent from 2023 in comparable States. Harvested acres were estimated at 16,800 acres, up 3 percent from the previous year in comparable States. The average yield was 10,800 pounds per acre, up 2,170 pounds from the previous year in comparable States. Of the total utilized production, 96.1 million pounds were for the fresh market and 84.5 million pounds were for processing. The value of the crop totaled \$475 million, up 26 percent from the previous season in comparable States, with an average annual price of \$2.63 per pound.

In 2024, estimates for raspberries began in Oregon.

Strawberry: Utilized production in 2024 totaled 32.2 million cwt, up 12 percent from 2023. Area harvested was estimated at 61,200 acres, up 8 percent from the previous year. The average yield was 528 cwt per acre, up 22 cwt from the previous year. Of the total utilized production, 26.2 million cwt were for the fresh market and 6.05 million cwt were for processing. The value of the crop totaled \$4.00 billion, up 13 percent from the previous season, with an average annual price of \$124 per cwt.

Tree Nuts Comments

Almond: Utilized production on a shelled basis in California for 2024 was estimated at 2.65 billion pounds, up 13 percent from 2023. Bearing acreage was estimated at 1.38 million acres, unchanged from the previous year. The average yield was 1,980 pounds per acre, up 200 pounds from the previous year. The value of the crop totaled \$5.66 billion, up 40 percent from the previous season, with an average annual price of \$2.14 per pound.

Hazelnut: Utilized production in Oregon for 2024 totaled 96,800 tons, up 3 percent from the previous year. Bearing acreage was estimated at 88,000 acres, up 16 percent from the previous year. The average yield was 1.10 tons per acre, down 0.14 ton from the previous year. The value of the crop totaled \$163 million, up 28 percent from the previous season, with an average annual price of \$1,680 per ton.

Macadamia: Utilized production in Hawaii for 2024 totaled 35.9 million pounds, down 2 percent from the previous year. Bearing acreage was estimated at 16,400 acres, up 3 percent from the previous year. The average yield was 2,190 pounds per acre, down 110 pounds from the previous year. The value of the crop totaled \$42.0 million, up 36 percent from the previous season, with an average annual price of \$1.17 per pound.

Pecan: Utilized production in 2024 totaled 265 million pounds, down 14 percent from 2023. Bearing acreage was estimated at 442,100 acres, up 1 percent from the previous year. The average yield per acre was 599 pounds per acre, down 105 pounds from the previous year. Of the total utilized production, 233 million pounds were sold shelled and 32.5 million pounds were sold in-shell. The value of the crop totaled \$468 million, down 9 percent from the previous season, with an average annual price of \$1.77 per pound.

Pistachio: Utilized production in California for 2024 totaled 1.10 billion pounds, down 26 percent from the previous year. Bearing acreage was estimated at 489,000 acres, up 6 percent from the previous year. The average yield was 2,250 pounds per acre, down 970 pounds from the previous year. Of the total utilized production, 902 million pounds

were sold in shell, and 198 million pounds were sold shelled. The value of the crop totaled \$2.05 billion, down 27 percent from the previous season, with an average annual price of \$1.86 per pound.

Walnut: Utilized production in California for 2024 totaled 603,000 tons, down 27 percent from the previous year. Bearing acreage was estimated at 370,000 acres, down 4 percent from the previous year. The average yield was 1.63 tons per acre, down 0.52 ton per acre from the previous season. Of the total utilized production, 481,000 tons were sold shelled, and 122,000 tons were sold in-shell. The value of the crop totaled \$1.04 billion, up 44 percent from the previous season with an average annual price of \$1,720 per ton.

Definition of Terms

Bearing acreage: An orchard, grove, or vineyard is considered to be of bearing age when it can normally be expected to produce a commercially significant quantity of the crop. Bearing age is a function of many factors including variety, rootstock, year planted, etc.

Apple crop: Apple production estimates are published only for commercial orchards, according to the laws governing crop production reports (7 U.S.C 590a). Commercial orchards, under these laws, are defined as orchards of 100 or more bearing trees.

Harvested not sold: Fruit of marketable quality that was picked but not sold for various reasons are included in total production.

Total production: The quantity of utilized production plus quantities harvested but not sold.

Utilization: These estimates refer to the first utilization, not necessarily the final utilization of a crop. For example, frozen fruit includes some fruit that may be later used for making preserves. Grade-outs for fresh market fruit which are processed are included in the processing quantity.

Utilized production: The amount of a crop sold plus the quantities used at home or held in storage represents utilized production.

Processing: Operations that alter the general state of the commodity, such as canning, cooking, freezing, dehydration, milling, grinding, pasteurization, pickling, juicing, or slicing.

Fresh Market: Utilized production that is not processed is considered fresh market.

Yield per acre: Unless otherwise stated, yield per acre is based on total production.

Price and Value Definitions

Price: Prices in this report represent the Market Year Average (MYA) price. For a crop sold for both fresh market and processing, the total crop MYA is a weighted average of the fresh and processing prices.

Prices for fresh fruit represent the average price producers receive at the point of first sale. This is commonly referred to as the average price as sold. The exception is fresh fruit sales in California, Michigan (apples only), New York (apples only), and Washington which are equivalent returns at packinghouse door.

Prices for fruit sold for processing are equivalent returns for fruit delivered to the processing plant door except for cranberries, California olives, and freestone peaches, which are priced at the first delivery point.

Value: Crop value estimates in this report cover the marketing season or crop year and should not be confused with cash receipts which are based on a calendar year.

State MYA Price and Value Computations

Fresh Market Value:

Fresh Market MYA * Fresh Market Utilization

Processed Value:

Processed MYA * Processed Utilization

"All" Value:

Fresh Market Value + Processed Value

"All" MYA:

"All" Value / "All" Utilization

For commodities with components not identified by market channel, substitute breakdown name for fresh market/processed and use the same procedure.

United States MYA Price and Value Computations

Fresh Market MYA:

$$\frac{\sum(\text{Fresh Market Value For All States})}{\sum(\text{Fresh Market Utilization For All States})}$$

Processed MYA:

$$\frac{\sum(\text{Processed Value For All States})}{\sum(\text{Processed Utilization For All States})}$$

"All" MYA:

$$\frac{\sum(\text{Value For All States})}{\sum(\text{Utilization For All States})}$$

Noncitrus Fruits Marketing Seasons

Apple, commercial: July to May for Michigan; August to June for all other States

Apricot: May 15 to July 5 for California; June 20 to August 1 for Washington

Avocado: November 1 to October for California; June 20 to March 1 for Florida; January 1 to December 31 for Hawaii

Blueberry, cultivated: March to October

Blueberry, wild: July to September

Cherry, sweet: April 25 to June 15 for California; June to July for all other States

Cherry, tart: June 25 to August 15

Coffee: October to September

Cranberry: September to January

Date: August 15 to March 15

Grape: May 25 to July for Table (California); June 5 to July 31 for Raisin (California); August 15 to December 15 for Wine (California and Washington); September 15 to November 1 for Juice (Washington); September to November for New York; August to October for Oregon

Kiwifruit: October 1 to May 31

Nectarine: April 30 to October 15

Olive: August 1 to July 31

Papaya: January 1 to December 31

Peach: July 10 to September 15 for Clingstone (California); April 20 to October 10 for Freestone (California); May to August for Georgia and South Carolina; July to September for all other States

Pear: July through June

Plum: May 15 to October 20 for California

Prune, dried: August 20 to April 15 for California

Raspberry: May through November

Strawberry: February 15 to December 15 for California; November to April for Florida

Tree Nuts Marketing Seasons

Almond: August 5 to November 15

Hazelnut: July 1 to June 30

Macadamia: July 1 to June 30

Pecan: October 1 to March 31

Pistachio: September 30 to January 30

Walnut: September 15 to November 10

For detail by States, see Agricultural Handbook No. 729, *Fruits and Tree Nuts: Blooming, Harvesting, and Marketing Dates*, December 2006.

Statistical Methodology

Survey Procedures: Probability based grower disposition surveys are used to collect acreage, yield, production, and price data. These fruit inquiries are generally mailed surveys at the end of the growing season. Telephone follow-up of mail survey non-response is used to ensure adequate coverage. They provide indications of the quantity used on farms, the quantity sold directly to consumers, and production not sold or utilized.

Estimating Procedures: Information obtained from the non-citrus fruits and nuts grower surveys along with federal administrative data is used to establish estimates of bearing acres, yield, total production, utilized production, price, and value. These estimates are reviewed for errors, reasonableness, and consistency with historical estimates.

Revision Policy: Final survey indications and check data for most non-citrus fruits and nuts are available prior to submitting utilization estimates. End-of-season estimates of production are made following harvest and are subject to revision the following year based on a thorough review of all available data.

Reliability: Survey indications are subject to sampling variability because all operations growing non-citrus fruits and/or nuts are not included in the sample. Survey results are also subject to non-sampling errors such as omission, duplication, imputation for missing data, and mistakes in reporting, recording, and processing the data. These errors cannot be measured directly, but are minimized through rigid quality controls in the data collection process and a careful review of all reported data for consistency and reasonableness.

Information Contacts

Listed below are the commodity statisticians in the Crops Branch of the National Agricultural Statistics Service to contact for additional information. E-mail inquiries may be sent to nass@usda.gov

Anthony Prillaman, Acting Chief, Crops Branch	(202) 720-2127
Chris Hawthorn, Head, Fruits, Vegetables and Special Crops Section.....	(202) 720-2127
Deonne Holiday – Almonds, Carrots, Coffee, Cranberries, Garlic, Onions, Plums, Prunes, Tobacco.....	(202) 720-4288
Bret Holliman – Apricots, Chickpeas, Nectarines, Peaches, Snap Beans, Sweet Corn, Tomatoes.....	(202) 720-7235
Chris Hawthorn – Blueberries, Cabbage, Dry Edible Beans, Kale, Lettuce, Macadamia, Maple Syrup, Pears, Raspberries, Spinach	(202) 720-2127
Krishna Rizal – Artichokes, Asparagus, Celery, Grapefruit, Kiwifruit, Lemons, Mandarins and tangerines, Mint, Mushrooms, Olives, Oranges, Pistachios	(202) 720-5412
Chris Singh – Apples, Cucumbers, Hazelnuts, Potatoes, Pumpkins, Squash, Strawberries, Sugarbeets, Sugarcane, Sweet Potatoes	(202) 720-4285
Antonio Torres – Beets, Cantaloupes, Dry Edible Peas, Grapes, Green Peas, Honeydews, Lentils, Sweet Cherries, Tart Cherries, Walnuts, Watermelons	(202) 720-2157
Chris Wallace – Avocados, Bell Peppers, Broccoli, Cauliflower, Chile Peppers, Dates, Floriculture, Hops, Papayas, Pecans	(202) 720-4215

Access to NASS Reports

For your convenience, you may access NASS reports and products the following ways:

- All reports are available electronically, at no cost, on the NASS web site: www.nass.usda.gov.
- Both national and state specific reports are available via a free e-mail subscription. To set-up this free subscription, visit www.nass.usda.gov and click on “National” or “State” in upper right corner above “search” box to create an account and select the reports you would like to receive.
- Cornell’s Mann Library has launched a new website housing NASS’s and other agency’s archived reports. The new website, <https://usda.library.cornell.edu>. All email subscriptions containing reports will be sent from the new website, <https://usda.library.cornell.edu>. To continue receiving the reports via e-mail, you will have to go to the new website, create a new account and re-subscribe to the reports. If you need instructions to set up an account or subscribe, they are located at: <https://usda.library.cornell.edu/help>. You should whitelist notifications@usda-esmis.library.cornell.edu in your email client to avoid the emails going into spam/junk folders.

For more information on NASS surveys and reports, call the NASS Agricultural Statistics Hotline at (800) 727-9540, 7:30 a.m. to 4:00 p.m. ET, or e-mail: nass@usda.gov.

If you have specific questions you would like an expert to respond to, please visit our “Ask A Specialist” website at www.nass.usda.gov/Contact_Us/Ask_a_Specialist.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at [How to File a Program Discrimination Complaint](#) and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.
